RE: Mine Plan Review
Trixie Mine Amendment
Burgin Project
ACT/049/009
Utah County, Utah

Dear Mr. Anderson:

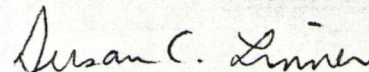

The Division of Oil, Gas and Mining (DOGM) staff has reviewed the "Amended Notice of Intention" submitted by Sunshine Mining and Minerals for the acquisition of the Trixie Mine. Several staff members also visited the mine site in late February of this year. The mine plan as submitted has been found to be deficient. The enclosed comments detail the inadequacies determined at this time. The additional information and clarification requested should be submitted by Sunshine Mining as a response to each concern, referenced by the appropriate rule number in the review.

Additional supporting documentation regarding mine permit areas must be provided in light of Sunshine's current use of HMC's and KCC's facilities, which include storage yards, an assay building and offices (See Rule M-5 of the enclosed document). The disclaimer provided in the Burgin mining and reclamation plan, ACT/049/009 section 30, will no longer apply unless it is further defined in accordance with recent developments. This may entail amending the mine plans to include all facilities being used in any capacity for Sunshine's mining operations.

Mr. William Anderson
ACT/049/009
April 16, 1984

It is recommended that a meeting be held between the Division and Sunshine Mining and Minerals to discuss these areas further and resolve misunderstandings concerning Sunshine's use of pre-existing facilities. Please contact me or Jim Smith, Administrator, Mineral Resource Development and Reclamation Program, to set up a meeting or discuss the enclosed review.

Sincerely,

Susan C. Linner
Reclamation Biologist/
Permit Supervisor
